Continuation of 2.: Applicants' proposed amendments set forth subject matter not previously claimed. For example, the temperature condition has not been previously claimed. Furthermore, unamended claim 20 requires addition of the urea during the recovery process; however, the proposed amendment requires addition of urea after the recovery process. Additionally, claim 23 states that the amine content of the polyol after addition of urea is 5 weight percent or less; however, the proposed amendment to claim 20 states that the amine content of the polyol prior to addition of urea is 5 weight percent or less. These amendments, if entered, would require further consideration and search of the prior art and would require further consideration with respect to issues of new matter.

Continuation of 5.: Applicants' response is based upon amendments that will not be entered.
